

Abstract

Powerflex Deluxe Walking Sticks

a walking stick is generally known as a lightweight, straight, rigid wooden stick, ~~usually~~ held in one hand, used as an aid in walking.

Powerflex Deluxe Walking Sticks are designed to be used in pairs, ~~as a~~ ^{like a} ~~pair of~~ ^{skis}

as an aid in walking,

and to exercise and tone the upper body muscles. The essential

feature, (and the invention) is

the curved and slightly flexible shaft, which has a shock absorbing and power releasing effect.

(Imagine a cross country skier, without skis or snow)
